425 DIADEM

This twin circuit, hot water and central heating programmer, with indicator lights, has 16 programmes available for fully pumped systems, including independent programming of heating and hot water and 10 programmes for gravity HW/pumped CH systems.

The Diadem is ideal for gravity systems and fully-pumped systems with zone valves.

425 TIARA

The Tiara has all the capability and features of the 425 Diadem, but without the indicator lights.

The Tiara is ideally suited for both gravity systems and fully-pumped systems with either mid-position or zone valves.

425 CORONET

A single circuit timeswitch for straightforward, accurate time control.

The 425 Coronet is particularly suitable for combi-boiler systems, warm air systems and extra zone control.
